

Donald Johnson

MASTER MODEL RAILROADER #122 DONALD C. JOHNSON

Donald C. Johnson, age 44, from the Sunshine Region, is MMR #122. He is a resident of North Miami, Fla., where he lives with his wife. His occupation is plumbing contractor.

Don got started in the hobby in 1973 when he and his wife thought they should have a train running around the Christmas tree. That first AHM 4-4-0 Genoa got him started in HO and later HOn3. On later visits to the hobby store for more materials such as buildings and kits, he met other modelers who invited him to the next convention. Soon after an enjoyable convention visit, Don joined the NMRA.

Don's layout is an 8' x 16' HO and HOn3. He holds certificates in Motive Power, Cars, Structures, Scenery, Civil Engineering, Electrical Engineering, and Association Volunteer. He feels that if the hobby can grow, it will do so by members participating as a group in the activities of the NMRA.
